Elemental Colors

At our core, we resonate with nature. Our bodies are attuned to her elements, her seasons, her rhythms. We each gravitate to an element or a combination of elements. And this shows in our art. Not just in the colors we use, but also in our composition, our shapes, our style, and the content we choose to express.

Earth

The earth palette encompasses many kinds of colors, ranging from the muted neutrals of stone and soil to rich vibrant jewel tones. Combinations are strong and solid. They can be dense, textural, and compelling to the touch.

One with earth energy is one who is her own person, likes to learn new things, be on her own.

A photograph of the finished loomed bracelet appears in the April/May 2007 issue of BEADWORK magazine.
